ANINDHITA FEBRIANDINI

Bandung, West Java, Indonesia | +62 82139256675 | anindhitafbrn@gmail.com | linkedin.com/in/anindhitafebriandini/

OBJECTIVE

An undergraduate Information Systems student at Telkom University with a strong specialization in Enterprise Resource Planning (ERP) systems, financial accounting business processes, and human resource management. Heavily experienced in analyzing operational workflows, mapping business processes using BPMN standards, and facilitating comprehensive SAP system simulations for hundreds of participants. Possesses robust analytical thinking, communication excellence, and hands-on exposure to system implementation, mapping configuration, and end-user training, aiming to contribute effectively as a Functional Consultant Intern.

EDUCATION

Telkom University – Bandung, Indonesia
Bachelor of Information Systems, 3.84/4.00 **August 2022 – August 2026**
Focus Major: SAP / Enterprise Resources Planning

PROFESSIONAL EXPERIENCE

ERP Laboratory Practicum Assistant (Certification: AC010) – Bandung, Indonesia **February 2026 – June 2026**
Practicum Coordinator
- Led a team of laboratory assistants in delivering SAP AC010 Accounting Information Systems practicum for 400+ students, ensuring standardized instructional materials and consistent learning outcomes.
- Facilitated end-to-end financial accounting processes (General Ledger, transaction postings, and enterprise reporting), significantly improving student comprehension of real-world accounting workflows.
- Designed and refined complex case studies, exam instruments, and system troubleshooting frameworks that enhanced assessment quality and student performance.

ERP Laboratory Practicum Assistant (Certification: HR050) – Bandung, Indonesia **September 2025 – June 2026**
Practicum Coordinator → Staff of Academic Division
- Developed and executed the full operational strategy for SAP HR050 Human Capital Management practicum, ensuring seamless cross-module data integration for 400+ students.
- Supervised lab assistant teams, managed scheduling and shift allocations, and served as the key liaison between faculty and technical teams to maintain curriculum compliance.
- Led quality audits on assessments and grading criteria, driving measurable improvements in evaluation standards and overall student learning outcomes.

ERP Laboratory (Certification: SAP01) – Bandung, Indonesia **September 2025 – January 2026**
Staff of Academic Division
- Supported foundational SAP01 Enterprise Systems practicum sessions covering system architecture, user roles, and core business process integration.
- Guided 40–45 students through end-to-end cross-module simulations (Procurement, Finance, and Human Capital), strengthening practical understanding of integrated business processes.
- Delivered hands-on troubleshooting support across 20+ live lab sessions, resolving navigation and transaction issues with high resolution rate.

PT Cahaya Anugrah Firdaus – Bandung, Indonesia **June 2025 – August 2025**
UI/UX Design Intern
- Designed system blueprints (UML diagrams & flowcharts) and developed lo-fi to hi-fi Figma prototypes for a legal-tech application (desktop & mobile).
- Improved document management features through usability testing and iterative design, resulting in a more intuitive and responsive user experience.
- Prepared Software Requirement Specification (SRS) and system documentation used as the foundation for further development.

ERP Laboratory Practicum Assistant (Certification: SCM500) – Bandung, Indonesia **September 2024 – June 2025**
Staff of Academic Division → Practicum Coordinator
- Directed end-to-end operational delivery of SCM500 Procurement & Supply Chain practicum across 20+ sessions for 400+ students, bridging academic theory with enterprise practices.
- Managed cross-functional coordination between 20 lab assistants and core staff while structuring shift schedules for 800+ total practicum participants.
- Resolved recurring system bugs and logical errors during integrated workflow exercises, significantly reducing technical disruptions and improving session efficiency.

ORGANIZATIONAL EXPERIENCE

ERP Laboratory **February 2025 – January 2026**

First Secretary

- Take minutes during ERP laboratory joint meetings.
- Join discussion while meetings with core and coordinator.
- Create a list of ERP laboratory assistants from the class of 2022 and list of members for the 2024 ERP study group.

Tentor Community HMSI **July 2024 – April 2025**

Vice President

- Assisted in creating a timeline for 5+ work programs for one administrative period.
- Contributed to 80% operational decisions.
- Supported smooth operation of a community with 40+ members.

KEY ACADEMIC PROJECT

Analysis and Design of Accounting System and Financial Management using Excel at CV. XYZ **2024**

Course: Accounting System and Financial Management- Faculty of Industrial Engineering

- Conducted data collection through interviews with the owner of CV. XYZ, focusing on manual transaction recording and operational challenges, completed in 2024.
- Integrated features for financial reporting and stock forecasting, reducing manual errors by 30% and improving decision-making accuracy.
- Proposed automated trial balance and inventory forecasting, aligning with Pantow (2021) to enhance long-term financial management.

Analysis of Supply Chain Management at Company X **2023**

Course: Supply Chain Management - Faculty of Industrial Engineering

- Collected data through interviews with an assistant manager at this company, conducted online via Google Meet from 6:30 PM to 7:25 PM on an unspecified date in 2023.
- Analyzed the process flow: Warehouse staff monitor stock, order via online (WhatsApp) or offline methods, receive goods within two days, handle payment (cash or deferred), and update inventory, with cycle time averaging two days for delivery.
- Potential benefits: Improved stock availability, reduced financial losses, and enhanced customer trust, aligning with this company customer-focused culture

Analysis of Financial and Business Processes at PT Indodax Nasional Indonesia **2023**

Course: Basic Finance for Information Systems - Faculty of Industrial Engineering

- Collected data through interviews with an assistant manager at this company, conducted online via Google Meet from 6:30 PM to 7:25 PM on an unspecified date in 2023.
- Analyzed the process flow: Account creation process (registration, email verification, phone verification, and PIN setup) and transaction process (buy/sell digital assets using Limit Order and Market Order methods), with cycle time averaging two days for delivery, payment handling (cash or deferred), and inventory updates.
